Guidelines for Project work

This is an individual assignment. Select any one company from the given list. The list of companies for your project work is given as a separate excel file.

Please ensure that a company chosen is analyzed only by one of you. If more than one chooses the same company for analysis both will be disqualified.

Download the selected company's annual report (English version only) for the years either 2023, 2022 and also 2021 (also 2020 for calculating the averages).

Each annual report covers information on the company's Income statement or Profit and Loss Account, cash flow statement and Balance sheet for two years

You are requested to calculate ratios to assess the following aspects from the financial statements.

- Profitability
- Liquidity
- Capitalization
- Asset Utilization or efficiency
- Dividend Policy

Write your critical comments on each of the aspects for the company based on the above ratios.

Your project report should not exceed seven pages
